Performance Certificate

Shreem Electric have carried out power quality analysis at our hospital, based on analysis study & observation they recommended us their new patented product Neutral Current Compensator(NCC) to reduce neutral current from 37 A to 2 A . They have installed this product in month of November till date product is working satisfactorily.

After installation of product we have got following benefits/advantages.

- 1) Voltage Fluctuation is reduced
- 2) Medical equipment breakdown reduced
- 3) Voltage stability improved

We thank Shreem Electric Ltd for such brilliant and innovative solution for our crucial problem. We strongly recommend NCC for similar problems. My best wishes to Shreem Electric Ltd for their new product.
